A Call to Leadership & Collaboration for Regional Sustainability & our Community's Livable Future

There is no limit to the creative solutions that can be devised to build our sustainable communities. Yet the scale and urgency of change required offers new dimensions and challenges. We must think beyond traditional boundaries and embrace new ways of working together.

The Regional Innovation Forum brings together engaged citizens and community leaders from every sector to explore the systemic challenges facing our region that require coordinated effort between individuals, communities, organizations, and local, regional and national policymakers. Oregon's deep roots in sustainable innovation and activism provide a platform for the all-encompassing societal change that is required to build a sustainable future.

Imagine a conference where the content is inspiring and the quality of conversations is transformational. Imagine a region leading the way for the nation, sharing our insights with other communities, and prospering. Dynamic leaders will make this happen. Will you be one of them?

SPACE FOR EACH FORUM IS LIMITED. REGISTER TODAY.
